Build Team Welder

Job Responsibilities/Description

1. Work with the experienced build team people to learn the art and science of building lifts, from setting and building the track to cleaning, priming, and painting welds to mounting the dolly and car, to mounting and wiring in the winch, control panel, limit switches and station buttons, and finally commissioning and testing each lift before delivering.
2. Work safely.
3. Keep job sites clean.
4. Look after tools and materials and report broken or worn-out equipment.
5. Store track and crossers so they shed water.
6. Always carry something up or down the hill when you're already making a trip.
7. Eliminate unnecessary steps.
8. Build with quality in mind.
9. Do not change the design independently.
10. Share suggestions and ideas.
11. Any other tasks relating to the tasks identified above or as may be directed by the Company from time to time.

Essential Skills

1. Can work safely at heights and learn to use climbing equipment, a Working at Heights Certificate is an asset.
2. Can safely and accurately cut angle iron with an angle grinder.
3. Excellent stick welding skills, no certificates are required.
4. Is eager to learn new skills.
5. Can lift one end of a piece of track comfortably (~100 lbs.)
6. Pays attention to quality and detail.
7. Willing to learn and follow established protocols.
8. Can problem solve and anticipate next steps.
9. Can work as part of an effective team and take on independent tasks.

Other Points

1. Must have a driver's license with a clean record and reliable transportation to the shop at 440 Ecclestone, Bracebridge.
2. Must be able to travel and stay at away jobs as required, accommodation and meals are included.
3. Pay starts at $23/hr, which includes travel time from shop to site to shop, a wage review will happen within two months.
4. This is a full-time seasonal position with a possible conversion to year-round work.
